

Changing Treatment Paradigms to Optimize Outcomes for Patients With Type 1 Gaucher Disease: A Case-Based Approach

PILAR GIRALDO, MD, PHD

Pilar Giraldo, MD, PhD, is Associate Professor of Hematology at Miguel Servet University, head of Clinical Hematology in the Hematology Department at Miguel Servet University Hospital, and Associate Researcher at Aragon Institute of Health Sciences, in Zaragoza, Spain.

Dr Giraldo earned a medical degree and a doctorate in medicine from the University of Zaragoza and master's degrees in research methodology and molecular oncology, respectively, from the University of Public Health and the Spanish National Cancer Research Center (CNIO), in Madrid.

Dr Giraldo is an active member of the Spanish Network for Research on Rare Diseases (CIBERER) and Director of the Spanish Gaucher Disease Foundation (FEETEG), an independent collaborative research group comprising biochemists, physicians, and epidemiologists. Her main research interests include epidemiology of rare diseases, the molecular biology of Gaucher disease, and translational medicine.
