

# Changing Treatment Paradigms to Optimize Outcomes for Patients With Type 1 Gaucher Disease: A Case-Based Approach

## ATUL MEHTA, MD, FRCP, FRCPATH

Atul Mehta, MD, FRCP, FRCPath, is a consultant hematologist and physician at the Royal Free Hospital, in London, part of the Department of Haematology of the University College London School of Medicine.

Professor Mehta completed undergraduate training at Cambridge University and King's College Hospital, in London. He then trained in general internal medicine and hematology at the Hammersmith Hospital (Imperial College London). His Doctorate in Medicine was sponsored by the Medical Research Council, and he studied molecular mechanisms underlying aplastic anemia.

As Clinical Director of one of six nationally designated lysosomal storage disorders units, he works with a team of researchers, nurses, physicians to develop and deliver care to patients with lysosomal storage disorders.

Professor Mehta is a senior examiner in hematology and medicine at the Universities of London and Cambridge and with the Royal College of Pathologists. He is the author of 3 books, more than 40 chapters, and more than 200 publications in peer-reviewed journals.
